EDUCATION

University of Maryland, Baltimore County (UMBC) – Baltimore, MD

Graduated, Dec 2024

- Bachelor of Science in **Computer Science**, minor in **Mathematics**, GPA: 3.46/4.0.

Relevant coursework: Multivariable Calculus, Computer Architecture, Linear Algebra, Statistics, Discrete Structures, Data Structures and Algorithms, GUI, Software Engineering I, Introduction to AI, Intro to Cybersecurity, Active Cyber Defense.

TECHNICAL SKILLS

- Software & Tools:** Microsoft Office Suite (Word, Excel, Teams, Outlook, SharePoint), Visual Studio, Figma, Jira, Trello, Slack.
- Languages Bilingual:** English and Vietnamese.
- Client Support & Communication:** Documentation, onboarding, role-based access, user education, process simplification.
- Programming Languages:** Java, C++, C, Python.
- Full-Stack Development:** HTML/CSS, JavaScript, React, Bootstrap, Next.js, Tailwind CSS, Firebase, Clerk.

PROJECTS EXPERIENCE

ClaimTrack - Insurance Claims Management System

Apr 2025 – Present

- Developing a full-stack insurance claims platform simulating real-world workflows for customers, agents, and admins using Next.js, Tailwind CSS, and Firebase.
- Implementing role-based access allowing customers to file claims, agents to approve/reject them, and admins to manage system activity.
- Designing a modern, responsive interface using Figma, with dynamic status tracking (Submitted → In Review → Approved/Rejected).
- Integrating the Google Gemini API to build a chatbot assistant that guides users through the claims-filing process.
- Prioritizing accessibility and security, including form validation, Clerk authentication, and input sanitization.
- Creating clear technical documentation to support scalability, ease of future updates, and collaboration.

Supportlify IT Helpdesk – [<https://supportlify.vercel.app/>]

Aug 2024 – Dec 2024

- Led frontend development of three engineers using React, Next.js, Tailwind CSS, and Clerk for user authentication in a collaborative IT helpdesk system.
- Designed and implemented a comprehensive ticket management system, incorporating full CRUD (Create, Read, Update, Delete) functionality to streamline support ticket processing and manage user roles.
- Implemented role-based access control (RBAC) to manage user accounts, allowing administrators to promote contacts to admin roles and enforce proper permissions.
- Utilized Jira to track tasks, sprints, and progress, maintaining clear communication and accountability within the team and ensuring smooth project delivery.
- Collaborated with cross-functional teams to gather requirements, improve features, and optimize the system's performance demonstrating strong communication and teamwork skills throughout the project.
- Maintained comprehensive technical documentation and managed asset tracking to ensure smooth deployment and future scalability.

NFL Player Performance Data Analysis

Nov 2024 – Dec 2024

- Worked collaboratively with classmates to analyze NFL player performance using Python in Google Colab.
- Cleaned, organized, and analyzed Excel datasets to assess the impact of temperature and altitude on wide receiver efficiency.
- Applied statistical methods and created visualizations (graphs, charts) to present data-driven insights.
- Presented findings as a group to classmates, explaining statistical insights and data visualization results.

WORK EXPERIENCE

Program Leader Specialist at Booster – Full Time

June 2025 - Present

- Will lead and facilitate school fundraising programs focused on promoting physical activity, teamwork, and character development in elementary schools.
- Will utilize Booster's internal software platforms and mobile tools to manage event logistics, scheduling, and real-time data reporting for K–5 programs.
- Will coordinate with cross-functional teams using CRM platforms, cloud-based tools, and communication software to track progress and ensure data accuracy.
- Expected to support digital system operations and ensure smooth information flow between school sites and Booster's backend systems.

Math Tutor at Amplify – Part-time

Jan 2025 – May 2025

- Providing one-on-one and group support, adapting explanations to individual learning needs
- Tracking student progress and communicating effectively to improve performance
- Collaborating with teachers to identify students' challenges and develop solutions to improve their learning
- Build trust and collaboration through strong interpersonal and communication skills

Software Engineer at Head Starter AI - Fellowship

Jul 2024 – Sept 2024

- Built and deployed over five AI applications and API projects using Next.js, Tailwind CSS, OpenAI/Gemini, and Stripe API
- Served as the Frontend Lead, designed the UI/UX in Figma, and implemented it with Next.js, Tailwind CSS, and Clerk for user authentication.
- Led a team of three engineering fellows to develop a patient management system for orthodontists and dental clinics, optimizing scheduling and record-keeping processes.
- Showcased effective communication skills through regular stand-ups, team meetings, and status updates, informing all stakeholders about the project's progress.
- Coached by Amazon, Bloomberg, Google, and Capital One engineers on Agile, CI/CD, and microservices architecture.

EXTRACURRICULAR ACTIVITIES

Member of the Information System Security Association at UMBC

Feb 2023 – May 2023

Member of the Computer Science Club at AACC

Feb 2021 – Jun 2022
